

Networking your voice & data doesn't have to be that complicated.

Decision Systems Plus, the leading integrator of telephone and computer solutions, offers simple yet complete networking solutions for all your telecommunications needs, whether you have a single location or multiple locations throughout North America and across the world.

We provide best-of-breed products and services to:

- Unify the resources of your company into a single cohesive business unit
- Grow your enterprise at your pace with scalable architecture
- Leverage your existing network with standards-based infrastructure
- Enable integration of your communication system and computer applications
- Power your communication with flexible endpoints, including PDA, wireless & IP phones
- Complete your solutions with collaboration and messaging tools

The Decision Systems Plus advantage provides highly scalable, future-proof solutions that effectively break down barriers to communication, thereby increasing productivity, customer service, and ultimately, competitive advantage.

We'd like to meet with you to analyze your business needs and goals.
